#### Journal envelope gives readers chance for feedback, support

Today, readers will find the semiannual\voluntary subscription envelope tucked inside the Journal. There's a new wrinkle this time, as readers have an opportunity to declare "I Love My Journal."

Journal president Don Miller explains the voluntary subscription drive in his "My View" column on the Opinion Page. Subscription revenue from Journal readers helps to defray a small portion of the cost of news, sports and feature stories and photographs that appear in the Journal every week. As always, there is space on the voluntary, subscription envelope for reader comments.

It's a valuable resource for editors to determine the best ways to improve the Journal.

Each and every suggestion, comment or criticism is read by Journal editors. The feedback is very welcome.

Thank you for your continuing support.

#### 30 attend town meeting

### **Residents question Davis**

By Scott Cousins Staff writer

As town meetings go, Wednesday's was about normal, according to State Rep. Steve Davis.

Davis, a Wood River
Democrat, has scheduled 11
town meetings throughout his
district in the next few weeks.
The fourth was held at the
Pontoon Beach Senior Citizens'
Center Wednesday morning.

About 30 residents attended, with four or five asking most of the questions. Topics included problems with the retired teacher's health insurance, the possible closure of the Melvin Price Support Center, Social Security and motorcycle helmet laws.

Before taking questions, Davis briefed the audience on what ha been going on in Springfield.

"The Republicans are in control," he said. "As a freshman Democrat I don't have a lot of influence." Since January, he said 2,500 bills have been introduced in the House. Of those, about 550 have

come out of committee.

County Board member Rudy

Davis said the state has an obligation to help retired teachers. He said legislation has been introduced to fund 75 percent of the insurance cost, but it has not been acted on yet. After the meeting, he said it would probably require current teachers; he state, school did not an et direct teachers to all pay a little more.

James Taylor of Mitchell, a Democratic committeeman, asked about the status of a bill that would allow fraternal organizations to have gambling machines. He said such machines would provide revenue for the organizations' good deeds.

Davis said he did not know if

the bill was out of committee yet, and did not indicate his position on such a bill.

Davis was also questioned about Social Security.

Although it is a federal matter and he has nothing to do with it, Davis said it would be politically unwise to touch the program.

After questions, Davis asked for the audience so printion on proper than the program of the proper of the proper

#### Congress gives away responsibility

TO THE EDITOR:

Once again our industrious Congress prepares to shirk part of its responsibility by allowing the executive branch to assist in the writing of legislation. (line item veto).

Though it gailed me at first, I begin to see promise in this plan. In the spirit of "lean and mean," perhaps we could jut dispense with the accrued monies to ease the deficit.

Since I'm told that Mr. and Mrs. Clinton hold law degrees, they might just take over the functions of the Supreme Court, thus adding to the savings. If their daughter studied day and nights, she could become the Cabinet. (I heard Hitler got started this way.)

#### Journal needs help to bring your news

An often-quoted phrase states that the three most important things in real estate are location, location and location. The real part of the real estate are location, location and location. For each continuous and location, location and location. The real estate where the real estate locat, local and locat.

Each week our reporters, writers and editors spend all of their time covering all aspects of the real estate location. There are no Associated Press (AP) wire reports of the news of Afghanistan or Zaire, no coverage of sports events in California or Florida filling our papers. Instead, Journal readers receive the most complete

### **Beautiful Roses**

from the experts at

he time is here to make a run for the make a run for the roses! To Frank's, that is. Our big million dollar\* rose sale is going on and you certainly won't be disappointed at what you'll find.

Let's go into a little detail about the ever-popular rose, also known as the "queen of flowers." It didn't get that name just by accident. Nearly everybody loves 'em. They speak the language of love. Nothing says "I love you" quite like a red rose.

These beautiful flowers have been on this continent for somewhere around 32 for somewhere around 32 million years, give or take a few. And there are several types available. Many are named after famous people, such as Queen Elizabeth, Mister Lincoln, John F. Kennedy and others.

You may have heard about the different classes of roses. A few are: Hybrid Tea, Floribunda and Grandiflora. Now for the definitions.

Hybrid Teas usually reach a height of four to five feet, with one flower per stem. Floribunda roses generally reach three feet with bloon in clusters. Grandifloras ca reach six feet in height, with five to seven blooms per

Now's an excellent time to plant roses. The roots become established before the plants leaf out in late spring. Roses grown in plastic or peat containers can be planted from spring through fall, but fall-planted roses can suffer some winter damage. And don't forget another reason for planting another reason for planting now. Frank's million dollar rose sale!

Once you get your prized beauties home, you'll want

They should be placed in n area that gets at least six ours of sunlight per day. he soil should be welldrained and fertile. If it isn't, fixing it now will pay big dividends later.

When you dig the planting hole, add one shovelful of organic material such as peat moss, compost or cow manure to one shovelful of soil, and mix it thoroughly. Then add Frank's Plant Starter to stimulate strong, healthy roots. When the first bloom appears, fertilize once a month with Frank's Rose Food.

Roses need water, like anything else. Not a deluge, though, just enough to keep them evenly moist. Water once the top inch of the soil feels dry. Use a soaker hose or water early enough in the day so the soil to the soil feels with the soil feel feel feels with an indeed environment. ideal environment.

A two to three-inch layer of pine bark, wood chips or peat moss helps keep the soil moist, hampers the growth of weeds, and it will cut down on your watering.

Pests can be a major enemy of roses, but fortun-ately there are plenty of pest control products available. Just make sure you follow the label's directions.

So make plans to visit Frank's during this big event. The selection is fantastic and so are the prices!
